

FAQ #42: What is the difference between V23 3D Standard and Pro?

Q: I'm not sure I understand the differences between BobCAD-CAM V23 3D Standard and 3D Pro. What are the differences?

A: BobCAD-CAM V23 3D Standard does not come with the Equidistant Offset 3D finishing toolpath, and has different versions of the Z Level Rough and Z Level Finish toolpaths.

The easiest way to tell which version of the milling package you have is to click on **Help** in the main menu and choose **License**.

In the **License** dialog that will appear, look under **Mill**.

If the seat of BobCAD-CAM V23 is licensed for 3D Standard, there will be only one check for **Level 1** in the boxes and one for **Level 1** under **Other**. If it is licensed for 3D Pro, there will be 3 checks under **Mill** as shown below and **Other** won't have any.

If you have 3D Standard but would prefer the extra 3D toolpaths that Pro offers, contact the BobCAD-CAM sales department at 1-877-262-2231 toll-free in the US and Canada and 727-442-3554 Int'l.
