Other

Machine Controller Make and Model:

Controller: _____
(e.g., Fanuc 10M, Mistubishi Meldas 640M, etc.)

Machine: _____
(e.g., Matsura 760, etc.)

In order for us to build a post processor to support your machine, we need these things:

- ***Only one post request per form, please!***
- ***NC Program known to work properly on this machine***
- ***A list of accepted G/M codes (or equivalent for controllers that do not accept G/M codes)***
- ***Examples and complete descriptions of all desired machining canned cycles***

Please include all of the above items (as applicable) with your request and fax, mail, or email it to the contacts listed at the top of this form. After we have reviewed your request, a support representative will contact you at the number above to confirm that we have all that we need or to request additional information if required.
